Subject: Ongoing Pipeline Site Data - follow up from Regional Mid-Years

Hi everyone –

As promised during the Tuesday call attached is the set of site data that supports the ongoing RI/FS, RD and RA project slides. Please have a look. The Superfund Program Review Steering Committee was interested in looking at the site information to determine what could be driving the durations. At yesterday's Steering Committee call we decided that, for now given everything that is going on, this is informational, no deadlines per se, but if there are questions or observations to please share them. The data are intended to provide a sense of the universe of sites that would be affected by the Program Review recommendations. If you have any questions or would like to discuss further please let us know.

Thank you!

Best, Robin
